Office Action Summary	Application No. 10/781,623	Applicant(s) GREENE ET AL.	
	Examiner Brian K Andrea	Art Unit 3662	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 20 February 2004.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-9 are rejected under 35 U.S.C. § 112, 1st and 2nd paragraphs, as the claimed invention is not described in such full, clear, concise and exact terms as to enable any person skilled in the art to make and use the same, and/or for failing to particularly point out and distinctly claim the subject matter which the Applicant regards as the invention.

There is insufficient support, structural or even theoretical, to enable one of ordinary skill in the art to make and use any mode of the present invention without undue speculation and invention. The principle of triangulation is not an issue; it is how it is achieved that will constitute the invention and an adequate disclosure under the law. The concepts have no support in physical reality at this scale that covers the globe. The claims state a desired result without the basic supporting techniques and/or apparatus to achieve such a result. These claims do not meet the minimum requirements defined in MPEP § 2172.01 where the essential matter that is depicted by proper disclosures such as in the references of record must also be included in the present application including the claims. If Applicant's are alleging that there is an

Art Unit: 3662

apparatus known in the art to achieve the invention, then it must be identified sufficiently to enable one to make and use what is then considered to be novel. There is yet no way of determining when a satellite is illuminated by four different measuring beams all within 50ns of each other. How can it be alleged that this is known and where is the support for such? How is the exact position of each measuring station measured "in different countries"? There are as yet no steps to the claimed method.

Specification

4. The specification is objected as above under 35 U.S.C. § 112, 1st and 2nd paragraphs.

Drawings

5. The drawings are objected to under 37 CFR 1.83 in that every feature claimed must be shown, in particular an operative embodiment. No attempts have been made to meet this objection in the parent cases. Any amendment must address this issue or be held "non-responsive."

Conclusion

6. This is a continuation of applicant's earlier Application No. 10/452,142. All claims are drawn to the same invention claimed in the earlier application and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the earlier application. Accordingly, **THIS ACTION IS MADE FINAL**

Art Unit: 3662

even though it is a first action in this case. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no, however, event will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

7. The references of record have been cited as in the parent applications.
8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brian K Andrea whose telephone number is (703) 605-4245. The examiner can normally be reached on M-F 7:00-3:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas Tarcza can be reached on (703) 306-4171. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
